

CHECK-IN GUIDE

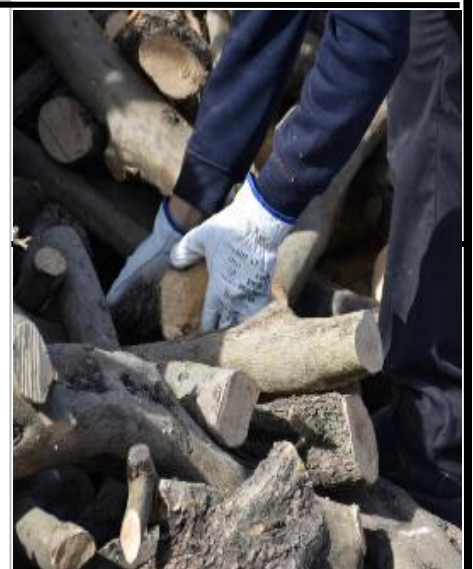

The villa has a [mixed heating system](#).

All rooms have split-system heat pumps, and only the wall radiators are used in the common areas. **The bedroom radiators only operate if the air conditioning in those rooms fails.**

If the villa experiences a power outage, ALL the circuit breakers in the electrical panel at the entrance of the house must be reset.

Firewood for the fireplace or barbecue is not included in the stay, so it can be purchased if desired by calling 608 840 234 between 8:00 a.m. and 2:00 p.m.

CHECK-IN GUIDE

***If you plan to use the fridge/bottle cooler in the garden kiosk during your stay at the villa, please let us know.**

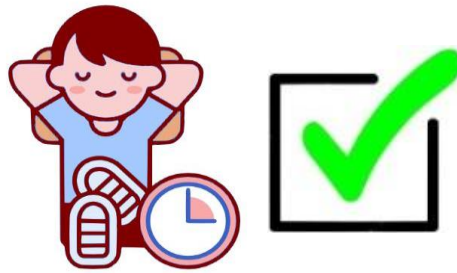

***The sheets and towels for the sofa beds upstairs and downstairs can be found into the footrest and the white trunk next to the pool table.**

There are two ceramic hobs in the villa's kitchens; one of them has two induction burners that are currently out of service as there is no induction cookware available.

IT IS VERY IMPORTANT to thoroughly rinse used dishes under the sink tap before putting them in the dishwasher with food scraps. Failure to do so will clog the dishwasher filter and prevent the dishes from being properly cleaned.
